OPIS • DESCRIPTION • BESCHREIBUNG

SLO

Omare INSERT FILL in COMPOSE so izdelane iz 18 mm debelih ivernih plošč oplemenitenih z melaminsko folijo in zaključenih z ABS robov, razen oboda predelne omare FILL (1VI-00-92), ki je debeline 36 mm. Ko so vrata omar v lesnem dekorju ali dekorju sivega kamna, so korpusi v dekorju sivega kamna. Pri ostalih izvedbah so korpusi v beli barvi. Korpusi omar INSERT FILL in COMPOSE brez vrat so dobavljivi v vseh dekorjih. Elementi v modri, zeleni ali ciklam barvi so lakirani. Predalniki imajo obod in čelnice vedno v enakem dekorju.

Tapeciranje blazine predalnika je možno v enake tkanine kot elementi STONEHENGE. Steklana vrata so iz kaljenega jedkanega stekla.

Elementi omar INSERT se večinoma lahko nalagajo eden na drugega. Pri tovrstni postavitvi jih je potrebno medsebojno zvižati. Elementi FILL višine 46 cm so predvideni za vstavljenje v predelno omaro FILL (1VI-00-92). V kolikor se ti elementi vstavljajo v spodnji ali zgornja dva prekata, je obvezen dokup hrbišča FILL. Pri zabojčku FILL hrbišče ni obvezno.

EN

INSERT FILL and COMPOSE cupboards are made of 18 mm melamine faced particle board, edged with ABS, except the carcass of the dividing cabinet FILL (1VI-00-92), which is made of 36mm thick MFC. The carcasses of cupboards are in grey stone MFC when the cupboard doors are in wood or grey stone MFC. All other cupboard carcasses are white. Carcasses of cupboard INSERT FILL and COMPOSE without doors can be produced in all finishes. Elements in blue, green and cyclamen colours are lacquered. Pedestal drawer fronts and carcasses always come in the same finish.

Fabric for upholstered cushion on the pedestal is the same as with STONEHENGE elements. Glass doors are made of tempered etched glass.

Almost all elements of INSERT cupboards can be put on top of each other. In this case, they have to be screwed together. 46cm high FILL elements are intended to be put in the dividing cabinet FILL (1VI-00-92). In case these elements are put in the top or bottom compartments, it is necessary to add the backpanel FILL. The backpanel is not necessary with Box FILL.

GER

Die INSERT FILL und COMPOSE Schränke sind aus 18 mm dicken melaminbeschichteten Spanplatten mit umlaufender ABS-Kante ausgeführt. Ausnahme hier macht der Trennschrank FILL (1VI-00-92) der aus 63 mm starkem Material ausgeführt ist. Wenn die Schranktüren im Holzdekor oder Graustein-Dekor ausgeführt werden, werden die Schränke im Graustein-Dekor geliefert. Bei den anderen Ausführungsformen sind die Schrankkorpen in weiß ausgeführt. Die INSERT FILL und COMPOSE Schrankkorpuse ohne Türen sind in allen Dekoren lieferbar. Die blau-, grün- oder zyklamenfarbigen Elemente werden lackiert. Die Schubladenkorpen und Frontplatten sind immer in demselben Dekor ausgeführt.

Die Kissen für die Schubladen haben das identische Gewebe wie die STONEHENGE Elemente. Die Glastüren sind aus gehärtetem geätzttem Glas.

Alle INSERT-Schränkelemente können in den meisten Fällen aufeinander gestapelt werden. Bei dieser Montagemethode müssen die Elemente miteinander verschraubt werden. Die FILL-Elemente in der Höhe von 46 cm sollen in den FILL-Trennschrank (1VI-00-92) eingelegt werden. Falls diese Elemente in die untere Trennwand oder in die oberen zwei Trennwände eingelegt werden, wird der Zukauf von FILL-Rückwand unbedingt notwendig. Beim FILL-Kasten wird die FILL-Rückwand nicht unbedingt notwendig.
